## Summary of Professional Grade Insect Killer:

**We back our Fire Ant Killer for 2 years** against Fire Ants inside equipment (this will save you up to 4 times what your paying for the alternative over 2 years)

**Does not leach in soil.** If you have a Pad-mount flood with water and it takes 3 weeks for it to drain, your going to have 100% activity from our product after the box drains, with alternative, once the product gets wet it starts to leach and begins to become less active.

**Lasts Longer than Alternative.** The Half life of our product is 7-9 months on the recommended rate from the EPA... Our product is 10 times the recommended rate therefore Fire Ant Killer 100 will last longer than 2 years inside equipment.

**You can also use this product outside** of the Pad-mount, in meter boxes, around control boxes in and around structures, Lawns and many more places.

**It is a Kill on Contact** which will kill the insect within a few minutes after it touches it, alternatives take much more time to work and Ant Baits become non-active once they become moist or wet.

**Kills Fire Ants, Roaches, Spiders, Scorpions** and over 100 additional insects and pests away.

**Environmentally Responsible.** Uses 25 times less chemical in our environment than Alternative and achieves 10 times the results. (Comes from a natural compound)

**Convenient Packaging** You have the choice of 64oz/4 lb Pre-filled EZ Grip shaker containers, 4oz pouches and 8oz pouches.

R-ChemCo's Mission is to introduce specialty products into the industrial, commercial, utility, municipal, governmental and transportation markets locally and nationally.
